Results-driven Data Analyst with 5+ years of experience designing and implementing business intelligence solutions across multiple industries. Proven track record of delivering actionable insights that reduce operational inefficiencies and empower leaders to make faster, more confident decisions. Seeking to leverage expertise in data analytics and visualization to help organizations unlock the full value of their data and drive sustainable business growth.

SKILLS

Business Intelligence & Visualization	Power BI (Desktop & Service), Tableau
Programming & Query Languages	SQL, DAX, Python
Databases	PostgreSQL, Microsoft SQL Server, MySQL
Cloud Platforms	Microsoft Azure, Oracle Cloud
ETL ELT	Azure Data Factory, Power Query
Data Warehousing & Big Data	Microsoft Fabric, Snowflake, Databricks
AI & Automation	Copilot (Power BI), DAX generation via Claude, natural language querying, MCP Server
Productivity Tools	Microsoft Excel, PowerPoint, Word

PROFESSIONAL EXPERIENCE

Maxil Technology Solutions INC

December 2024 – Present

Role: Data Analyst

Oak brook, IL

- **Designed and implemented end-to-end Power BI solutions** - from data extraction and semantic model development to automated dashboard delivery-cutting manual reporting effort by 50%.
- Collaborated with stakeholders to define and track KPIs using Power BI and DAX, creating customized dashboards that reduced reporting turnaround time by 30% and supported faster decision-making.
- Built the Medallion architecture on Microsoft Fabric using **Azure Data Factory** and **Power Query**, delivering clean datasets that streamlined Power BI data loading and reduced data-preparation time.
- Analyzed large datasets using advanced **SQL** techniques (joins, window functions) to improve data accuracy, streamline processes, and enhance performance of reporting systems.
- Designed and developed Power BI **data models** to aggregate and transform data from multiple sources, achieving data accuracy, and improving query performance.
- Optimized Power BI report performance by refining **DAX** queries and applying data modelling best practices, improving report load times by 40%.
- Designed and implemented incremental data refresh strategies in Power BI to optimize data loading and refresh performance for large datasets, minimizing resource utilization and improving user experience.
- Created and maintained static and dynamic **Row Level Security** (RLS) for multiple Power BI Service reports, ensuring data access is properly restricted and improving security compliance
- Leveraged **Copilot** in Power BI to accelerate analysis end-to-end - using natural-language queries and DAX generation to build metrics, then Copilot's summarization tools to translate findings into executive-ready narratives.
- Acted as a subject-matter expert (SME) for Power BI within the organization, mentoring junior consultants and leading knowledge-sharing initiatives that boost team productivity.

- Integrating **Claude AI** via **MCP Server** to enable natural-language querying and automated insight generation from Power BI datasets, accelerating stakeholder-ready reporting and reducing time-to-insight for analytics.

Davita Kidney Care

June 2024 – November 2024

Role: *Data Analyst*

Chicago, IL

- Analyzed **EHR** data from clinical systems and built **10+ interactive Power BI dashboards** visualizing patient visit histories, medication administration records, vital signs, and lab results, improving care-coordination visibility.
- Designed, optimized, and maintained complex SQL queries, stored procedures, and views in Microsoft SQL Server and MySQL to support data extraction, transformation, and reporting across multiple business applications, enabling faster and more reliable reporting for stakeholders
- Improved data-processing efficiency by 30% by conducting systematic exploratory data analysis and data profiling, using advanced Excel functions such as INDEX-MATCH, pivot tables, and array formulas.
- Defined, developed, and implemented **Power BI data models** to generate meaningful clinical insights and delivered 10+ self-service analytical visualizations to business users, enabling on-demand access to operational KPIs.
- Troubleshoot and resolve issues related to data quality, performance, and usability.
- Worked closely with IT teams to manage Power BI Premium capacity resources, ensuring adequate allocation and efficient utilization.
- Oversaw **Power BI Service** operations—establishing automated workflows and governance frameworks to ensure seamless data accessibility and reporting reliability for clinical teams.

Cognizant Technology Solutions INC

January 2021 – December 2022

Role: *Data Engineer*

Bangalore (India)

- Built and managed **ETL pipelines** with Keystone and SQL to load inventory data into **Snowflake**, ensuring data accuracy and boosting pipeline efficiency by 30%.
- Developed **SQL queries** using joins and subqueries to retrieve data from the database, enhancing data accessibility for analytical reporting.
- **Reduced data-retrieval time by 25%** by designing and optimizing star schemas in Snowflake that unified inventory data across warehouse locations to support analytical reporting.
- Created **50+ custom SQL queries** in MySQL Workbench, delivering clean datasets that powered Tableau dashboards and reduced data-preparation time.
- Designed **Tableau reports**, enabling end users to quickly access information with on-demand filters and replacing multi-day manual reporting cycles.
- Participated in team sprints and collaborated with business teams to deliver business intelligence projects that shortened reporting turnaround by several days.

Sunshine Technology

September 2019 – August 2020

Role: *Software Engineer*

Hyderabad (India)

- Worked on collecting and analyzing the data from Oracle DB to identify and categorize tables into fact and dimension tables to build a basic data model.
- Responsible for creating reports and dashboards to visualize retail KPIs like Net Profit Margin, Sell Through rate, and Conversion rate - enabling business teams to use the reports in decision making.
- Assisted in the documentation of OBIEE solutions, including data source connections, data transformation processes, and report specifications.

EDUCATION

University of Cincinnati, Master of Science, Information Technology | Cincinnati, OH | May 2024

CGPA: 3.97

Relevant Courses: SQL, Grad Topics in IT, Advance Algorithms, Advanced Storage Technologies, Cybersecurity, Power BI

CERTIFICATIONS

credly

Microsoft Certified: Azure Fabric Data Engineer Associate (DP-700)

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

Microsoft Certified: Azure Fundamentals (AZ-900)
